2-7904-21 Constant Temperature Oil Tank Digital Type EO-2X

使用例

Features

- A propeller stirring pump keeps the temperature in the tank uniform.
- The interior of the water tank is made of stainless steel and has excellent durability.
- The water tank perimeter is insulated to keep the surface temperature down.
- Precise temperature control with PID control!

Spec

- body size (mm) : Approximately 95 x 405 x 265
- tank inner size (mm) : Approximately 500 x 300 x 150
- water tank Dimensions (mm) : Approximately 540 x 335 x 215
- material : SUS304
- temperature settings range: R.T. + 10 to 180 ° C
- Temperature Adjustment Accuracy: ± 1 ° C (Performance of a single controller)
- temperature controller: PID Control
- Stirring in Tank: Propeller Stirring Type
- Heater capacity: 800 W
- Safety Device: Liquid Expansion Type Excess Temperature Rise Prevention Device, Motor with Temperature Fuse
- power supply: AC100V 50/60 Hz 11 A
- Weight: about 10 kg

▶ Package size : 430×610×410 mm 11 kg
